

# PROJECT OVERVIEW.

*“MyVenue bridged the gap between table service restaurant solutions and enterprise POS. We’re running bars, food concessions, kiosk ordering, and table service, plus we’re tracking what stock’s where in real time. Very few platforms could do both, but MyVenue does it brilliantly.”*

~ **Drew Perfilio**, Assistant General Manager

# project

Replace legacy system with an event-driven POS solution designed specifically for the hospitality sector. Provide a new dimension of in-venue commerce by empowering patrons with self-service kiosks that reduce lines and increase purchase sizes.

## solution deployed

**mvPOS**

*Hardware agnostic POS*

**mvManager**

*Real-time reports, dashboards & config*

**mvKiosk**

*Fast self-service kiosk*

## benefits

### Fast, easy-to-use

POS interface scientifically designed to reduce button touches and speed up service to keep lines short.

### Data visibility

Real-time dashboards and reports can be viewed on internet-connected devices, anywhere and at anytime.

### Centralized POS

A single comprehensive solution that has consolidated POS operations across every F&B outlet in the building.
